

Exabanque

Multi-bank and cash management software on the Internet for SMEs

The Exabanque software, provided by Exalog, meets your needs for payments, collections and treasury management, as well as accounting reconciliation, regardless of your company's size or business activity.

Exabanque is easy to install, multi-bank connected, and available over the Internet (SaaS, Software as a Service) and on mobile phones (Apple and Android). It also allows you to manage your banking transactions from any European bank account.
